E.JACQUIN – Telemetry screen for FrSkyTaranis
V2.00 30/11/2014

Current mA consumption / total capacity (from current sensor)

Rssi

Lipo cells number

Tx voltage

Max altitude

Variometer

Instant Altitude

Trims

Lipo gauge based on mA lipo consumption

Estimated remainting time (based on lipo instant consumption / capacity)

Instant consumption

Max consumption

Average consumption (activated only when throttle stick is on)

Estimated remainting time (based on average consumption / capacity)

Instant lowest cell voltage

Instant lipo pack voltage

Lipo gauge based on Instant lowest cell voltage
